Profile

Electronics and Communication Engineering graduate (2026) with practical, project-based experience in Python and Machine Learning. Built and deployed small-scale ML/NLP applications and completed a signal-processing internship at DRDO. Looking to start a career as a Software / ML Engineer, with a strong willingness to learn on the job.

Skills

- **Programming:** Python
- **Machine Learning / NLP:** Scikit-learn, NLTK, spaCy, HuggingFace Transformers (used at project level)
- **Web / Tools:** Streamlit, FastAPI (basic), Git/GitHub
- **DevOps:** Docker (basic), GitHub Actions (basic CI/CD)
- **Other:** MATLAB (signal/image processing), Basic Linux/Bash

Projects

SentimentScope – Aspect-Based Sentiment Analysis GitHub

Python, HuggingFace, spaCy, Streamlit, Docker

- Fine-tuned a DistilBERT model on the SemEval-2014 dataset to classify review sentiment per product attribute (positive/negative/neutral), reaching 87.3% test accuracy
- Used spaCy to automatically extract aspect terms from review text, avoiding manual labelling
- Built a Streamlit dashboard for real-time, colour-coded sentiment results and containerised the project with Docker

DocuBot – Retrieval-Augmented Generation (RAG) Q&A System GitHub

Python, HuggingFace, FAISS, FastAPI, Docker

- Built a RAG pipeline: PDF ingestion → chunking → embeddings → FAISS vector search → answer generation using an open-source LLM run locally
- Exposed `/ingest` and `/query` endpoints via FastAPI with an auto-generated OpenAPI spec
- Added source-and-page citations to answers to reduce hallucinated responses
- Used during the DRDO internship to search 200+ pages of research notes in under 10 seconds

AI Job Matcher – Resume-Based Job Recommendation System GitHub

Python, Streamlit, BeautifulSoup, PDFPlumber, Docker

- Built a Streamlit web app that parses resumes (PDFPlumber) and recommends jobs in real time
- Scraped live job postings with BeautifulSoup and ranked listings by skill match
- Containerised the app with Docker and set up a basic CI/CD pipeline

Experience

Intern – Image Processing & Signal AI, Defence Research and Development Organisation (DRDO) Aug 2025 – Jan 2026

- Developed IR image processing algorithms in MATLAB for noise reduction in defence imaging systems
- Implemented Non-Uniformity Correction (NUC) to improve sensor output quality
- Applied digital filtering and frame correction methods, measurably improving processed image SNR

Education

B.Tech in Electronics and Communication Engineering 2022 – 2026

Central University of Jammu

CGPA: 7.6

Certifications & Leadership

- IIRS START Program – Merit Certificate (ISRO/IIRS, remote sensing & satellite applications)
- Internship Certificate – Defence Research and Development Organisation (DRDO)
- Coordinator, Aviocast Club – led technical events, managed cross-functional team collaboration
