Profile

Electronics and Communication Engineering graduate (2026) with practical, project-based experience in Python and Machine Learning. Built and deployed small-scale ML/NLP applications and completed a signal-processing internship at DRDO. Looking to start a career as an AI/ML Engineer, with a strong willingness to learn on the job.

Skills

- **Languages & Core:** Python, SQL
- **ML Libraries:** Scikit-learn, NumPy, Pandas
- **NLP:** HuggingFace Transformers, spaCy, NLTK
- **MLOps / Deployment:** Docker, Git/GitHub, MLflow, AWS (basics)
- **Visualization:** Power BI
- **Concepts:** Supervised/Unsupervised Learning, Model Evaluation, Feature Engineering, Model Deployment

Projects

SentimentScope – Aspect-Based Sentiment Analysis

Python, HuggingFace, spaCy, Streamlit, Docker

[GitHub](#)

- Fine-tuned a DistilBERT model on the SemEval-2014 dataset to classify review sentiment per product attribute (positive/negative/neutral), reaching 87.3% test accuracy
- Used spaCy to automatically extract aspect terms from review text, avoiding manual labelling
- Built a Streamlit dashboard for real-time, colour-coded sentiment results and containerised the project with Docker

DocuBot – Retrieval-Augmented Generation (RAG) Q&A System

Python, HuggingFace, FAISS, FastAPI, Docker

[GitHub](#)

- Built a RAG pipeline: PDF ingestion → chunking → embeddings → FAISS vector search → answer generation using an open-source LLM run locally
- Exposed `/ingest` and `/query` endpoints via FastAPI with an auto-generated OpenAPI spec
- Added source-and-page citations to answers to reduce hallucinated responses
- Used during the DRDO internship to search 200+ pages of research notes in under 10 seconds

AI Job Matcher – Resume-Based Job Recommendation System

Python, Streamlit, BeautifulSoup, PDFPlumber, Docker

[GitHub](#)

- Built a Streamlit web app that parses resumes (PDFPlumber) and recommends jobs in real time
- Scraped live job postings with BeautifulSoup and ranked listings by skill match
- Containerised the app with Docker and set up a basic CI/CD pipeline

Experience

Intern – Image Processing using ML Algorithm

Aug 2025 – Jan 2026

Defence Research and Development Organisation (DRDO)

- Developed IR image processing algorithms in MATLAB for noise reduction in defence imaging systems
- Implemented Non-Uniformity Correction (NUC) to improve sensor output quality
- Applied digital filtering and frame correction methods, measurably improving processed image SNR

Education

B.Tech in Electronics and Communication Engineering

2022 – 2026

Central University of Jammu

CGPA: 7.6

Certifications & Leadership

- IIRS START Program – Merit Certificate (ISRO/IIRS, remote sensing & satellite applications)
- Internship Certificate – Defence Research and Development Organisation (DRDO)
- Coordinator, Aviocast Club – led technical events, managed cross-functional team collaboration
